PROFESSIONAL SUMMARY

Results-driven Frontend Engineer with 2+ years of experience shipping 4 production SaaS products and 15+ features used by 10,000+ registered users and 100+ partner businesses (hotels, restaurants, and agencies). Specializes in React.js, Next.js, TypeScript, Tailwind CSS, and microfrontend architecture, including building applications from the ground up. Improved page load times from baseline to 100–300ms through SSR, caching, and code-splitting strategies. Experienced working in hybrid and fully distributed teams, collaborating asynchronously with remote engineers across multiple squads and resolving cross-team technical dependencies. Skilled in REST/GraphQL API integration, unit testing (Vitest), and delivering WCAG-accessible, production-grade interfaces in Agile/Scrum environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Dart, HTML5, CSS3

Frontend Frameworks & Libraries: React.js, Next.js, Flutter, Tailwind CSS, ShadCN UI, Redux Toolkit, React Query (TanStack Query)

Backend & APIs: Node.js, RESTful APIs, GraphQL, Axios, WebSockets

Architecture & Practices: Microfrontend Architecture, Server-Side Rendering (SSR), Static Site Generation (SSG), Lazy Loading, Code Splitting, Component-Driven Development, Responsive Web Design, WCAG Accessibility

Performance & Testing: Core Web Vitals Optimization, Unit Testing, Vitest, Lighthouse, Cross-Browser Compatibility, Client-Side Caching

Tools & Platforms: Git, GitHub, Postman, Figma, Vercel, Android Studio

Methodologies: Agile, Scrum, CI/CD Practices, Role-Based Access Control (RBAC)

PROFESSIONAL EXPERIENCE

Frontend Engineer | **Voyatek Group** Feb 2025 – Present | Lagos, Nigeria (Hybrid)

- Shipped 15+ production features across 4 SaaS products within the Gopaddi ecosystem, several built from the ground up, serving 10,000+ registered users and 100+ partner businesses including hotels, restaurants, and agencies.
- Worked within cross-functional squads (2 backend + 2 frontend engineers on core teams, scaling to 1 backend + 1 frontend on later teams), routinely coordinating with engineers outside my immediate team to resolve cross-product dependencies.
- Built interactive social timelines, dynamic post-creation and resharing workflows, private event modules, and a real-time 'Moments' story-sharing feature for the Gopaddi social networking platform (Monaco Team).
- Developed enterprise-grade HR modules including employee management, leave management, policy & configuration, task management, and role-based access control (RBAC) with granular permissions (Madrid Team).
- Engineered supplier-facing event management portals and currently leading development of secure, real-time financial data management and accounting modules.
- Improved page load times to 100–300ms by implementing SSR, client-side caching, lazy loading, and code splitting, directly improving user experience across all 4 products.
- Integrated complex REST and GraphQL APIs using React Query (TanStack Query), reducing redundant server requests and achieving seamless asynchronous state synchronization across micro-apps.
- Wrote unit tests with Vitest to validate component behavior and reduce regressions, and collaborated closely with fully remote engineers across teams, communicating effectively async to keep work unblocked across time zones.

- Collaborated with UI/UX designers in Figma to deliver pixel-perfect, responsive, and WCAG-accessible interfaces across mobile and desktop breakpoints.

IT Support Associate (NYSC) | Voyatek Group *Mar 2024 – Feb 2025 | Lagos, Nigeria*

- Diagnosed and resolved hardware, software, and network issues for internal staff, sustaining 95%+ operational uptime and minimizing productivity downtime.
- Designed and deployed responsive HTML email templates, strengthening brand consistency across internal and external communications.
- Led technical onboarding for new hires and provided cross-functional technical assistance to product and engineering teams.

Earlier Experience

- **IT Personnel, Kabzeel Investment Limited** (Jul 2023 – Nov 2023) — Managed secure digital resource access control and maintained technical client communications.
- **IT Support Specialist, Swift Networks Limited** (Oct 2021 – Jul 2022) — Monitored database integrity, billing systems, and baseline network security protocols.
- **ICT Intern, Lagos State Ministry of Information & Technology** (Jun 2021 – Oct 2021) — Supported engineering teams in executing digital transformation initiatives across state agencies.

PROJECTS

iPhone 15 Pro Interactive Web Experience

Next.js, Tailwind CSS, GSAP, Three.js

Engineered an immersive 3D product showcase using Three.js for WebGL rendering and GSAP for scroll-triggered animations, demonstrating advanced frontend performance engineering. [iphone-doc.vercel.app](#)

Enterprise Restaurant Application

React.js, Next.js, Tailwind CSS, Axios

Built a fully responsive, pixel-perfect culinary platform with optimized image delivery, dynamic routing, and structured UI component architecture. [gerich-restaurants.vercel.app](#)

Credit Card Fraud Detection System

Python, Scikit-Learn, XGBoost, Random Forest

Trained and evaluated ensemble ML models (XGBoost, Random Forest, KNN, Logistic Regression) to detect fraudulent transactions, assessed via precision-recall curves and F1 scores.

EDUCATION

B.Sc. Computer Science — Olabisi Onabanjo University

2018 – 2023

Second Class Honors | Ogun State, Nigeria

CERTIFICATIONS

-
- IBM Front-End Development Professional Certificate — IBM / Coursera
 - IBM Applied AI Professional Certificate — IBM / Coursera
 - Google IT Support Professional Certificate — Google / Coursera
 - Cloud Application Development Foundations Specialization — IBM / Coursera
